Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

DFD Level 0: ServiceNow-Based Employee Laptop Request Application

An employee submits a laptop request, which is routed to their manager for approval. Once approved, IT checks stock and assigns an asset, then fulfils the request and hands the device over to the employee. Throughout the process, status updates are read from the Requests, Asset Inventory, and Users stores and pushed back to the employee and manager as notifications.

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Employee (End user)	Registration & Login	USN-1	As an employee, I can log into the application using my company SSO credentials so that I don't need a separate password.	I can access my dashboard immediately after SSO login.	High	Sprint-1
		USN-2	As an employee, I receive a confirmation email the first time my ServiceNow profile is provisioned.	I receive an email confirming my account is active.	Medium	Sprint-1
	Laptop Request Submission	USN-3	As an employee, I can submit a laptop request by selecting a model and providing a business justification.	Request is created with status "Pending Approval" and visible on my dashboard.	High	Sprint-1
		USN-4	As an employee, I can attach supporting documents (e.g. an approval memo) to my request.	Uploaded file is attached to the request and visible to the approver.	Low	Sprint-2
		USN-5	As an employee, I can save a request as a draft and submit it later.	Draft is saved and can be retrieved and edited before submission.	Medium	Sprint-2
	Status Tracking & Notifications	USN-6	As an employee, I can view the real-time status of my laptop request on a dashboard.	Status updates automatically as the request moves through the workflow.	High	Sprint-2
		USN-7	As an employee, I receive an email/SMS notification whenever my request status changes.	Notification is sent within 5 minutes of a status change.	Medium	Sprint-2
Manager (Approver)	Approval Workflow	USN-8	As a manager, I can view all pending laptop requests from my direct reports in a single queue.	Queue displays every pending request assigned to me, sorted by submission date.	High	Sprint-1
		USN-9	As a manager, I can approve or reject a laptop request and add comments.	Status updates immediately and the employee is notified with my comments.	High	Sprint-1
		USN-10	As a manager, I receive an automatic reminder if I haven't actioned a request within 2 business days.	Reminder email is sent once the SLA is breached.	Medium	Sprint-2
IT Support / Asset Admin	Asset Assignment & Fulfilment	USN-11	As an IT admin, I can view approved requests and check available stock before assigning an asset.	Current stock count is displayed accurately for each laptop model.	High	Sprint-2
		USN-12	As an IT admin, I can assign a specific asset (by serial number) to an approved request.	Asset is linked to the request and its inventory status changes to "Allocated".	High	Sprint-2
		USN-13	As an IT admin, I can mark a request as fulfilled once the laptop is handed over or shipped.	Request status updates to "Closed" and the employee is notified.	Medium	Sprint-3
System Administrator	Reporting & Dashboard	USN-14	As a system administrator, I can view an SLA compliance dashboard showing average approval and fulfilment times.	Dashboard reflects accurate, near real-time data.	Medium	Sprint-3
		USN-15	As a system administrator, I can generate a report of laptop requests by department and cost centre.	Report can be filtered and exported as CSV or PDF.	Low	Sprint-3
