

Functional & Performance Testing Template

Model Performance Test

Date	31 July 2026
Team ID	
Project Name	ServiceNow-Based Employee Laptop Request Application
Maximum Marks	

Test Scenarios & Results

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	Laptop Request Form Field Validation	Enter valid and invalid values in Employee Name, Department, and Laptop Type fields	Valid inputs accepted, mandatory-field and format errors shown for invalid inputs	Valid inputs accepted, errors correctly displayed for invalid/missing inputs	Pass
FT-02	Laptop Configuration Selection (Basic/Advanced)	Select Basic and Advanced laptop options and submit request	Correct configuration is captured and routed as per selection	Basic and Advanced selections captured and routed correctly	Pass
FT-03	Approval Workflow Trigger	Submit a request that requires manager approval and check workflow execution	Approval task is generated and assigned to the correct approver	Approval task generated and correctly assigned to approver	Pass
FT-04	Record Update on Approval/Rejection	Approve one request and reject another, then check the Laptop Request record	Record status updates to Approved or Rejected accordingly	Record status updated correctly for both Approved and Rejected cases	Pass
FT-05	Email Notification Check	Submit and process a request, then check requester's inbox	Email notification is sent at each workflow stage	Email notifications received at every workflow stage	Pass
FT-06	ServiceNow API/Integration Check	Verify Flow Designer trigger and record API connectivity on form submission	Workflow trigger fires successfully and updates the instance	Workflow trigger fired successfully with no connectivity errors	Pass
PT-01	Response Time Test	Use a timer to measure time from form submission to workflow trigger	Should be under 3 seconds	Workflow triggered within acceptable time	Pass
PT-02	Concurrent Request Load Test	Submit multiple laptop requests simultaneously from different users	System should process all requests without slowdown or errors	All concurrent requests processed without slowdown or errors	Pass
PT-03	Attachment Upload Load Test	Attach multiple supporting documents to a request and check processing	Should work smoothly without crashing	Attachments processed smoothly with no crashes	Pass

Summary: 9 / 9 test cases executed - Pass Percentage: 100%. Project executed successfully with all functional and performance test cases passing.
