Project Name	ServiceNow-Based Employee Laptop Request Application
Maximum Marks	

Project Overview:

Project Name: ServiceNow-Based Employee Laptop Request Application

Project Description: A ServiceNow catalog-based application that lets employees request a laptop, routes the request through manager approval via Flow Designer, and tracks it through IT fulfilment and asset assignment.

Project Version: 1.0

Testing Period: 21 July 2026 to 30 July 2026

Testing Scope:

- Laptop Request catalog item and form field validation
 - Manager approval workflow (approve / reject)
 - IT fulfilment and asset assignment
 - Email notifications at each workflow stage
 - Record status updates (Pending, Approved, Rejected, Fulfilled)
 - Reporting dashboard for request tracking
-
- As an employee, I want to submit a laptop request so that I can get a laptop assigned to me.
 - As a manager, I want to approve or reject laptop requests from my team.
 - As an IT fulfiller, I want to assign an asset and close out approved requests.

Testing Environment:

URL/Location: ServiceNow Developer Instance - <https://devXXXXXX.service-now.com>

Credentials (if required): Test user accounts provided separately for Requester, Manager, and IT Fulfiller roles

Test Cases:

Test Case	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
-----------	---------------	------------	-----------------	---------------	-----------

ID					
TC-001	Submit Laptop Request with valid details	Open Laptop Request catalog item Enter Employee Name, Department, Laptop Type Click Submit	Request record is created and routed for approval	Request record created and routed for approval as expected	Pass
TC-002	Submit Laptop Request with missing mandatory fields	Open Laptop Request catalog item Leave Department field blank Click Submit	Form shows validation error and blocks submission	Validation error displayed, submission blocked	Pass
TC-003	Manager approves a laptop request	Log in as manager Open pending approval Click Approve	Request status updates to Approved and requester is notified	Status updated to Approved and email notification sent	Pass
TC-004	Manager rejects a laptop request	Log in as manager Open pending approval Click Reject with comments	Request status updates to Rejected and requester is notified with reason	Status updated to Rejected and requester notified with comments	Pass
TC-005	IT fulfils an approved laptop request	Log in as IT fulfiller Open approved request Assign asset and mark Fulfilled	Request status updates to Fulfilled and asset is linked to record	Status updated to Fulfilled with asset correctly linked	Pass
TC-006	Email notifications at each workflow stage	Submit a request Approve the request Fulfil the request	Email sent at submission, approval/rejection, and fulfilment stages	Emails received correctly at all three stages	Pass
TC-007	Concurrent request submissions	Submit multiple requests simultaneously from different user accounts	All requests processed correctly without errors or slowdown	All concurrent requests processed successfully without errors	Pass

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	Approval email was delayed by a few minutes during peak load testing	Submit multiple requests simultaneously Observe email delivery time	Low	Closed	Notification queue optimized; delay resolved and retested successfully

Notes:

- All test cases cover both positive and negative scenarios.
- Detailed feedback was captured for each workflow stage tested.

- Bug tracking includes severity, status, and steps to reproduce.
- Sign-off to be obtained from both the project manager and product owner before deployment.
